

FOR IMMEDIATE RELEASE: June 20, 2016

Opportunity to Participate in FDA Clinical Testing for New Oral Health & Cosmetic Treatments

Currently enrolling panelists for clinical trials testing new products for oral health and cosmetic enhancements

Piscataway, NJ, June 20, 2016 – Enroll in a dentistry product testing trial to receive clinical treatments for cosmetic improvements (such as teeth whitening, stain removal, tartar control, etc.) or oral health concerns (such as cavities, dental sensitivity, dry mouth, gingivitis, etc.)

You will receive treatments at no cost to you in a state-of-the-art facility located in Piscataway, New Jersey and managed by Salim A. Nathoo, DDS., PhD, FICD. Dr. Nathoo is an internationally recognized and skilled dentist, inventor and scientist known for his work in esthetic dentistry and teeth whitening and is on the faculty at a major dental school in New Jersey. Dr. Nathoo conducts human clinical trials as well as provides dentistry and oral health clinical consulting services to devise studies and develop protocols.

To register to participate in a trial, please complete this [Trail Enrollment Form](#) and submit it to our office. One of our team members will contact you for more information and to answer any questions. This is an opportunity to receive and test new dentistry and oral health products at no cost to you. Please [visit our website](#) for more information about Dr. Nathoo and our services.

Dr. Nathoo has published over 90 papers and abstracts in a number of different areas of dental and oral health. He is also well known for inventing a number of dental products involving teeth whitening, dental stain, plaque, gingivitis and tooth sensitivity. He is also credited with devising a classification system that describes enamel staining called the [“N” or Nathoo Classification](#). He lectures to dental professionals nationally and internationally on how systemic and dental health is related and how various diseases impact dental health.

State-of-the-art facilities include:

- Four specially designed operating suites
- A Monitor Suite where monitors can view the testing area
- Sterilization Room for all instruments
- Clean Room to store and quarantine all products
- Secure Server Room for data analysis
- Locked Chart Room to meet HIPAA requirements
- Panorex X-Ray machine and digital radiographic systems

About Oral Health Clinical Services, LLC: Oral Health Clinical Service, LLC has provided independent clinical testing and consulting in Dentistry and Oral Health Care for the past twenty years. We have developed customized solutions for our consulting clients and have a record of devising testing methods and protocols to substantiate claims and ensure patient safety.

All clinical trials are conducted under **Good clinical practice (GCP)** guidelines set forth as an international quality standard by ICH regulatory guidelines involving human subjects. Each testing protocol is reviewed by an independent review board (IRB). Over time, new services will be added to accommodate other cosmetic, personal care products such as skin care.

We are currently seeking panelists to participate in a variety of oral health and dentistry product testing. For more information, please call 732-926-9300 or submit a [contact request form](#).
